

Our Church Schools Network

Church School Collaboration

This network is established to enable our Kernow Learning Church Schools to **work together** on their shared mission to enable all adults and pupils to **flourish**.

It allows the open and collaborative sharing of best practice, questions and school improvement.

Growing our Church Schools. Growing our Trust

This group works in **partnership** with our whole Trust and our partners in the Diocese of Truro to ensure that:

- The **vision of our Church Schools** has a theological Christian root
- The **vision of our Trust** resonates in the work of our Church Schools
- Trust and school **governance** is effective and meets the expectations of the Church of England
- The **curriculum** of our schools is an expression of their vision
- We continue to develop the **worship life** of our schools
- We ensure a **strong, positive culture** in our schools that is improved through being part of our Trust
- There is **high quality RE** in our schools

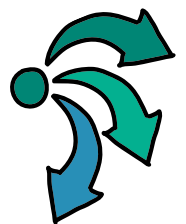

Support for ALL schools

The most important work of this group is **collaboration** - collaborating beyond the group of Church Schools and supporting the work of ALL schools.

As a group of Church Schools, we are passionate about the work we do which enables all pupils in our schools to 'live life in all its fullness' (John 10:10)

As a group of schools, we can offer support with:

- Developing a **high-quality Religious Education** offer in your school
- Ensuring that there is quality **collective worship**
- Understanding what **SMSC** looks like in action, how this can be developed and progress and understanding in these areas can be measured
- Developing or reviewing school **vision and values**-based leadership
- Engaging with the **community**
