## Introduction

We aim for all children to develop spiritually, morally, socially and culturally as they fully immerse in our rich, varied and stimulating curriculum giving them the knowledge and skills to become citizens in our diverse world.

## Why

We want our children to be curious about the world. To understand sustainable living and global citizenship. We seek to ignite a thirst for knowledge through engaging, inclusive lessons that are differentiated enabling all pupils to make progress academically, socially and spiritually. From this, our intent at Constantine Primary School is that our curriculum will enable every child to personally flourish, become solution focused global citizens, and as they progress into the next stage of their education, they have the requisite skills to be successful, independent and motivated learners.

Through collaboration with our children, staff, Governors and parents we seek to

nurture and develop our children's potential to be:

## How

This is achieved through a challenging curriculum, underpinned by core values, which provides our pupils with a range of experiences guided by our three key drivers:

- **Locality** – We seek to be aware of our place in the world and where we belong at a local, national and international level.
- **Environment**- We are passionate about the environment and its importance for all our future, which guides our role as global citizens
- **Healthy futures**- we pursue healthy outcomes which include a healthy body and mind as well as having high aspirations for our future.

## Planning

From the 'challenge question' that 'drives' the topic and the drivers that link to it, lessons encourage children to be inspired and to see the possibilities and hopes that comes with the learning. Lessons aim to develop their critical thinking through opportunities to make links in their learning, and through outlets to be creative, such as the arts and link through our community partnership. In the active learning experiences, they are encouraged to think about their environment. Teaching encourages the development of growth and dignity, to persevere when faced with difficult and new challenges and to know what it means to live in a diverse world. (see whole school curriculum overviews)

***Spirituality, Moral, Social and Cultural Education considers the 4 areas of: Self, Others, Beauty and Beyond to help children develop their spiritual awareness and foster a sense of responsibility:***

### **The Spiritual Development of children is encouraged through:**

- Developing children's curiosity to ask questions
- Through awe and wonder, in outdoor learning, during school visits, visitors and workshops and inspiring lessons
- Connection and belonging, through whole school assemblies, school ambassadors, connections to our local church and community projects
- Heightened self-awareness with daily opportunities to do an emotional check in, worry boxes and tools and strategies to build self-esteem and awareness in lessons and in P.S.H.E
- Prayer and worship, and through opportunities for daily discussion through wellbeing activities, emotional check ins or whilst considering a topical issue
- A sense of security, well-being, worth and purposefulness through the opportunities provided for leading as a school ambassador. Class systems that encourage, praise and develop purposeful learning
- The ability to be reflective about their own beliefs, (religious or otherwise) which inform their perspective on life and their interest in and respect for different people's feelings, values and faiths.
- Encouragement to reflect on their own experiences by promoting a sense of enjoyment and fascination in learning; about themselves, others, the world around them, and that which is intangible
- In developing the use of imagination and creativity in their learning

**The Moral Development of children is encouraged through:**

- Encouraging pupils to recognise the difference between right and wrong, take responsibility for their actions and developing codes of behaviour based on their knowledge of the moral codes, of their own and other cultures, for example, respect for property, care of the environment, and to have a respect for the civil and criminal law of England (see behaviour policy)
- Respecting others' needs, interests and feelings, as well as their own, and an ability to accept and appreciate that others may have a different viewpoint. To develop an understanding of the need to review and re-assess their values, codes and principles in the light of experience, offering reasoned views about moral and ethical issues
- Ensuring a commitment to personal values
- Promoting racial, religious and other forms of equality
- Providing models of moral virtue through literature, humanities, sciences, arts and assemblies; and reinforcing the school's values through images, posters, classroom displays, etc. and monitoring in simple ways, the success of what is provided

**The Social Development of children is encouraged through:**

- By developing an interest in, and understanding of, the way communities and societies function at a variety of levels. E.g. the family, the school, the local community, and the wider world and understand the notion of interdependence in an increasingly complex society, by identifying the key values and principles on which communities are based
- In a willingness to participate in a variety of social settings, cooperating well with others including working and socialising with pupils from different religious, racial, ethnic and socioeconomic backgrounds. To be able to promote all forms of equality and be able to share views and opinions with others, to foster a sense of community with common, inclusive values
- Being able to resolve conflicts maturely, appropriately and effectively, exercising responsibility and encouraging pupils to work co-operatively
- Providing positive experiences to reinforce our values as a school community –for example, through assemblies, team building activities, residential experiences, school productions
- A willingness to volunteer and reflect on their own contribution to the school community and wider society
- Show respect for people, living things, property and the environment

- In acceptance and engagement with the fundamental British Values (see the school teaching British Values Policy statement) of democracy, the rule of law, respect those with differing faiths and beliefs. Their attitude towards these British values allows the children to participate fully in and contribute positively to life in modern Britain.
- Providing opportunities for engaging in the democratic process, participating in community life, to exercise leadership and responsibility and to forge effective links with the wider community, e.g. the world of work

### **The Cultural Development of children is encouraged through:**

Cultural capital, gradually widening children's experiences as they progress through our school is an important step in providing rich and engaging learning across the curriculum. We plan carefully for children to have progressively richer experiences in reception and beyond, which are in line with our curriculum drivers: Inspiring, Creative, Active, Nurturing and Challenging.

- An understanding and appreciation of the wide range of cultural influences that encourages their own heritage
- A willingness to participate in, and respond to as artistic, literacy, musical, sporting, mathematical, technological, scientific and cultural opportunities
- An understanding and appreciation of cultural diversity within school as an essential element of their preparation for life in modern Britain. Greatly developed by observing their attitudes towards religious, ethnic and socio-economic groups in the local, national and global communities
- An ability to reflect on important questions of meaning and identity
- An interest in exploring the relationship between human beings and the environment
- By extending pupils' knowledge and use of cultural imagery and language and encouraging them to think about special events in life and how they are celebrated
- Recognising and nurturing particular gifts and talents; providing opportunities for pupils to participate in literature, drama, music, art, crafts and other cultural events and encouraging pupils to reflect on their importance and significance both personally and relationally
- Reinforcing the school's cultural links through displays, posters, workshops etc. developing partnerships with other schools and individuals to extend pupils' cultural awareness, for example providing opportunities to visit the theatre, museum and gallery visits
